PROFESSIONAL SUMMARY

Computer Science undergraduate (2027 batch, CGPA 9.02/10) with hands-on full-stack experience across frontend (React), backend (Node.js, Spring Boot, FastAPI), and database design (MySQL, MongoDB) — built and shipped through solo and team projects, including a platform selected for the Microsoft Build AI 2026 hackathon. Strong grounding in DSA and OOP, a fast learner who has repeatedly closed technical gaps under pressure, and looking to grow across the full stack through real-world mentorship.

EDUCATION

B.Tech, Computer Science & Engineering — *Centurion University, Bhubaneswar* 2023 – Present
CGPA: 9.02 / 10

XII (CHSE) — *FM University, Baleshwar* 2020 – 2022
Score: 87.83%

X (BSE) – *K.H.S, Kamarpal* 2020
Score: 85.33%

PROJECTS

Carbon Tracker — Full-Stack Carbon Footprint & ESG Analytics Platform — *Infosys Springboard Virtual Internship 7.0*
Spring Boot, React.js, PostgreSQL, Redis, Google Gemini API, JWT/OAuth2

- Built a full-stack carbon footprint tracking platform with JWT/OAuth2 authentication, real-time emission analytics, and an event-driven goal & badge tracking system.
- Integrated Google Gemini API for personalized reduction recommendations and extended the platform with a multi-tenant Organization module supporting department-level ESG-style emission reporting.

MindEase — AI-Powered Mental Health & Telehealth Platform — *Live in production* **GitHub** | **Live Demo**
React.js, FastAPI, Firebase, face detection, WebRTC (Agora), Tailwind CSS

- Integrated a pretrained facial emotion recognition model via ONNX Runtime into a computer vision pipeline (webcam frame → face detection → emotion classification), including edge-case handling to suppress false emotion output when no face is detected.
- Built a separate AI-powered contextual chatbot (NLP/GenAI component) using conversation history and CBT techniques to deliver personalized responses, alongside mood tracking and live analytics dashboards.

INTERNSHIP EXPERIENCE

Java Technology Stack Intern — *Infosys Springboard* Aug 2026 – Present

- Selected for Infosys Springboard's Java Technology Stack internship program, strengthening enterprise-grade Java development practices, OOP design, and backend problem-solving under an industry-aligned curriculum.

Web Dev. Intern — *Infotact Solutions* May – Jun 2025

- Developed backend modules in Java/Spring Boot, optimizing REST API endpoints in a production-grade codebase.
- Applied OOP principles in code design; participated in Agile sprints, code reviews, and unit testing/debugging.

TECHNICAL SKILLS

Languages: Java
AI Development & APIs: FastAPI, Spring Boot, Node.js, Express.js, REST APIs
Frontend: React.js, HTML, CSS, JavaScript
Databases: MySQL, MongoDB
CS Fundamentals: Data Structures & Algorithms, OOP, DBMS
Tools: Git, Postman, Agile/Scrum

ACHIEVEMENTS & CERTIFICATIONS

- Oracle Certified Foundations Associate — Agentic AI
- Google AI Essentials — Coursera
- Selected for Microsoft Build AI 2026 Worldwide Hackathon (AI at Work theme)
- 1st Runner-Up, TECHSPARK 2.0 — IEEE Computer Society, Centurion University
- 10-week McKinsey Forward Program 2026
